To : the Director of UFA composite LLC
Shabrin I.N.

We ask you to consider the possibility of manufacturing equipment for horizontal winding of fiberglass, working according to the method of periodic winding of glass-filled Fiber based on a polyester binder to produce fiberglass pipe and capacitive products.

1. The type : Horizontal Winding machine

Model :

- **01-2026/PU**, trolley equipped with impregnation tank.
- **3.2-2025/PU**, trolley equipped with impregnation tank.

2. Mandrel:

- **01-2026/PU**: Ø250 mm , Ø500 mm (6 meters length) – 1 pc each.
- **3.2-2025/PU**: Ø1000 mm (4.5 m length),
1500mm (3 m length)
3200 mm (2 m length)
1 pc each.

3. Auxiliary equipment required for production: None.

4. Date of placing the order – immediately after reaching to a final agreement.

5. We need the maximum pipe length produced for the 01-2026/PU to be 6 m , with digital control to linear and angular speeds of the trolley and winding shaft respectively.

Notes:

- No need for installation or commissioning.
- Required to know the estimated Delivery time for manufacturing and testing before shipping.
- Price is to be based on ExW Incoterms.
- Operation and Maintenance manuals are to be supplied in 2 hardcopies in English beside a soft copy.

Kindly prepare the quotation for above requirements ,Hopefully we can cooperate for having a winning deal for both parties.

Best Regards,

ABDELRAHMAN H. YOUSEF
GENERAL DIRECTOR
